Senate Bill 889 (as introduced 3-6-18)
Sponsor: Senator Marty Knollenberg
Committee: Education

Date Completed: 3-12-18

CONTENT

The bill would amend the Revised School Code to delete requirements that an individual pass the basic skills examination in order to receive a teaching certificate, and that a noncertificated, nonendorsed individual pass the basic skills exam in order to teach for more than one year.

The Code defines "basic skills examination" as an examination developed or selected by the Superintendent of Public Instruction or developed by an approved teacher education institution for the purpose of demonstrating the applicant's knowledge and understanding of basic language and mathematical skills and other skills necessary for the certificate sought, and for determining whether an applicant is eligible for a provisional Michigan teaching certificate. The bill would delete that definition.

Under the Code, the Superintendent may issue a teaching certificate only to an individual who has passed appropriate examinations as follows:

- For a secondary level teaching certificate, has passed both the basic skills examination and the appropriate available subject area examination for each subject area in which he or she applies to be certified.
- For an elementary level teaching certificate, has passed the basic skills examination and, if it is available, the elementary certification examination, and has passed the appropriate available subject area examination for each subject area, if any, in which he or she applies to be certified.

The bill would remove the requirement that an individual pass the basic skills examination.

The Code allows the board of a local school district or intermediate school district (ISD) to engage a full-time or part-time noncertificated, nonendorsed teacher to teach a course in computer science, a foreign language, mathematics, biology, chemistry, engineering, physics, or robotics, or in another subject area determined appropriate by the State Board of Education, or any combination of these subject areas, in high school.

A noncertificated, nonendorsed teacher is qualified to teach if he or she meets the following minimum requirements:

- Possesses an earned bachelor's degree from an accredited postsecondary institution.
- Has a major or a graduate degree in the field of specialization in which he or she will teach.

- If the teacher desires to teach for more than one year, has passed both a basic skills examination and a subject area examination, if a subject examination exists, in the field of specialization in which he or she will teach.
- Except in the case of individuals engaged to teach a foreign language, has, in the five-year period immediately before the date of hire, at least two years of occupational experience in the field of specialization in which he or she will teach.

The bill would remove the requirement that an individual pass the basic skills examination if he or she wishes to teach more than one year.

The bill would take effect 90 days after it was enacted.

MCL 380.1233b & 380.1531

Legislative Analyst: Nathan Leaman

FISCAL IMPACT

The bill would have no fiscal impact on the Department of Education and an indeterminate impact on schools that hire noncertificated, nonendorsed teachers. The Scholastic Aptitude Test (SAT) is used as the basic skills examination, which is paid for directly by individuals to The College Board, whether they are noncertificated, nonendorsed teachers or applicants for a teaching certificate. Removing the basic skills exam requirement for either category would not affect revenue generated by the Department. Also, the bill would not require significant changes to the current process of qualifying noncertificated, nonendorsed teachers or issuing teaching certificates.

Removing the basic skills examination requirement could increase the number of noncertificated, nonendorsed applicants. This could have varying impacts on the labor cost for hiring these teachers. However, these costs are indeterminate given the varying differences in the need of schools to hire noncertificated, nonendorsed teachers and labor market costs.
